

Resource room Curriculum
Grades 6-7
Mrs. Guerin-Faulkinberry
2010-2011

The resource room is being called The Pure Awesome Room. The students have decided on this name, the reason for the new name is because our students try to work towards their highest and wisest good. The classroom curriculum generally follows the regular classroom curriculum and goes beyond. Every student's academic, social and creative aspects are nurtured and given a chance to bloom.

6&7 Grade Math

The 6-7th grade math program is using the same format as the mainstream program. The students are given the same homework. The homework is modified if they don't grasp the concepts. Homework is given M-Th and is expected in the following day. We teach in great depths and use multi-sensory approaches, so the student feels comfortable. We review the homework everyday.

6&7 Grade L.Arts

The same vocabulary and grammar books are used. The students words are modified. They are tested in vocabulary and spelling every Friday. The students' journal at least three times a week. Some of the writing styles we teach are Narrative, Descriptive, Persuasive, etc. Grammar is given everyday. Homework M-Th.

6&7 Grade Literature

Memory work and book reports are given every marking period. We are proud to say that the greater part of the class is receiving 90 to 100% in their memory work. The 6th graders are beginning to read *Where the Red Fern Grows*. The 7th graders are reading the same novels as mainstream. We use the same literature as everyone else. Homework M-Th.

The Philosophy of our Class

Be kind to others. Have compassion. Really listen to others. Be understanding. Keep an open heart and mind. The more discipline I have, the more freedom I have. Responsibility is a talent. The students are adapting these philosophies in their lives. They are aware if homework isn't done it will be made up. Misbehavior will result in consequences. Good and honest work and behavior will always be rewarded.
