

To All,

First and foremost have a safe and happy summer. Summer is for kids to be kids.

As your child's teacher I strongly recommend reading anything they have an interest in.

As I've watched students through the years and it is clear to me the best students are those who love to read.

As for Math anytime you can go over Math facts (multiplication tables, rules for integers etc.) don't hesitate.

In the world of Science watch some videos relating to Earth, Physical and Chemical Science. Also if you want to tape any interesting specials or Science related shows, I'll take a look and use them in class.

As far as supplies go look on our website and those supplies for the middle school is sufficient for me.

Any questions about anything don't hesitate to email me at [milfordquinns@yahoo.com](mailto:milfordquinns@yahoo.com) or call me at 908 303-6742

Mr.Quinn
